

Staber Washer Model HXW2305 (White Cabinet)

The most efficient washer available based on energy, water, and detergent usage.

- Automatic pre-wash, wash, bleach, & softener dispenser
- Attached power cord & drain hoses
- Automatic cold extra rinse
- Safety lid lock
- Total front serviceability
- Stainless steel inner & outer tubs
- Reversible, variable-speed universal motor
- Maintenance free, self-cleaning electric water pump
- Heavy-duty four strut suspension
- Sealed front and rear heavy-duty bearings
- Mechanical knobs on control panel
- Patented tub design creates gentle water movement through your laundry
- Conveniently dispenses at the appropriate time so you do not have to
- Quick and easy installation
- Helps save energy and also reduces detergent residue in laundry
- Lid Lock prevents someone from accidentally accessing the tub while spinning
- Convenient access to parts, saves on repair bills, eliminates requirement for authorized service people
- Provides exceptional durability
- Eliminates need for expensive transmission, clutch, and brake assembly used in agitator washers
- No lint filter to have to periodically clean; synchronous pump motor reverses its direction to help clean itself
- Eliminates 'walking' and noise
- Provides exceptional durability and support for the inner and outer tubs
- Cleans more effectively than circular tubs

"Customer service at Staber is something you certainly can be proud of."
MB of Batavia, NY

"One of my best friends has a new washer whose brand used to be reputable and they're having a miserable time getting it serviced...and it's NEW! Am I ever happy I bought our Staber!"
Scott H.,
Lake Stevens, WA.

WASHER SPECIFICATIONS

| | |
|--------------------------------|---|
| MODEL | HXW2305 |
| GENERAL INFORMATION | 2.0 cubic feet approximately 15 Lbs. (12 standard size bath towels or up to a normal size comforter depending on thickness). The cubic feet cannot be compared as an 'apples-to-apples' comparison with other washers because our entire tub volume is utilized by being a top load horizontal-axis tub design. |
| MOTOR | Universal/digital-electronically controlled motor |
| AGITATION | Rotates in one direction at about 42 RPM for 13 seconds, pauses for 3 seconds, rotates the other direction (to keep your laundry from tangling) |
| SPIN RPM | 400 (Delicate & Permanent Press); up to 750 (Normal) |
| ELECTRICAL REQUIREMENTS | 110-120V, 60hz, 5 to 6 Amp Motor Amps Being Drawn During Spin 3 Amps |
| DIMENSIONS | 27" wide, 26" deep, 42" high, 55" with lid open (See illustration below) |
| Water Usage | Controls amount of water entering machine during each fill. Use High setting for all normal loads containing a fully or loosely packed tub. Use Low setting for loads containing only a few garments |
| WEIGHT | 190lbs net, 255lbs shipping |
