kWh/year (kilowatt-hours per year) is a measure of energy (electricity) use.
Your utility company uses it to compute your bill. Only standard size clothes washers
are used in this scale.

**Clothes washers using more energy cost more to operate.
This model's estimated yearly operating cost is:**

\$14

when used with an electric water heater

\$7

when used with a natural gas water heater

Based on eight loads of clothes a week and a 2004 U. S. Government national average cost
of 8.60¢ per kWh for electricity and 91.0¢ per therm for natural gas. Your actual operating
cost will vary depending on your local utility rates and your use of the product.
